

GIZA LIGHTS.® CATALOG

NO. 1

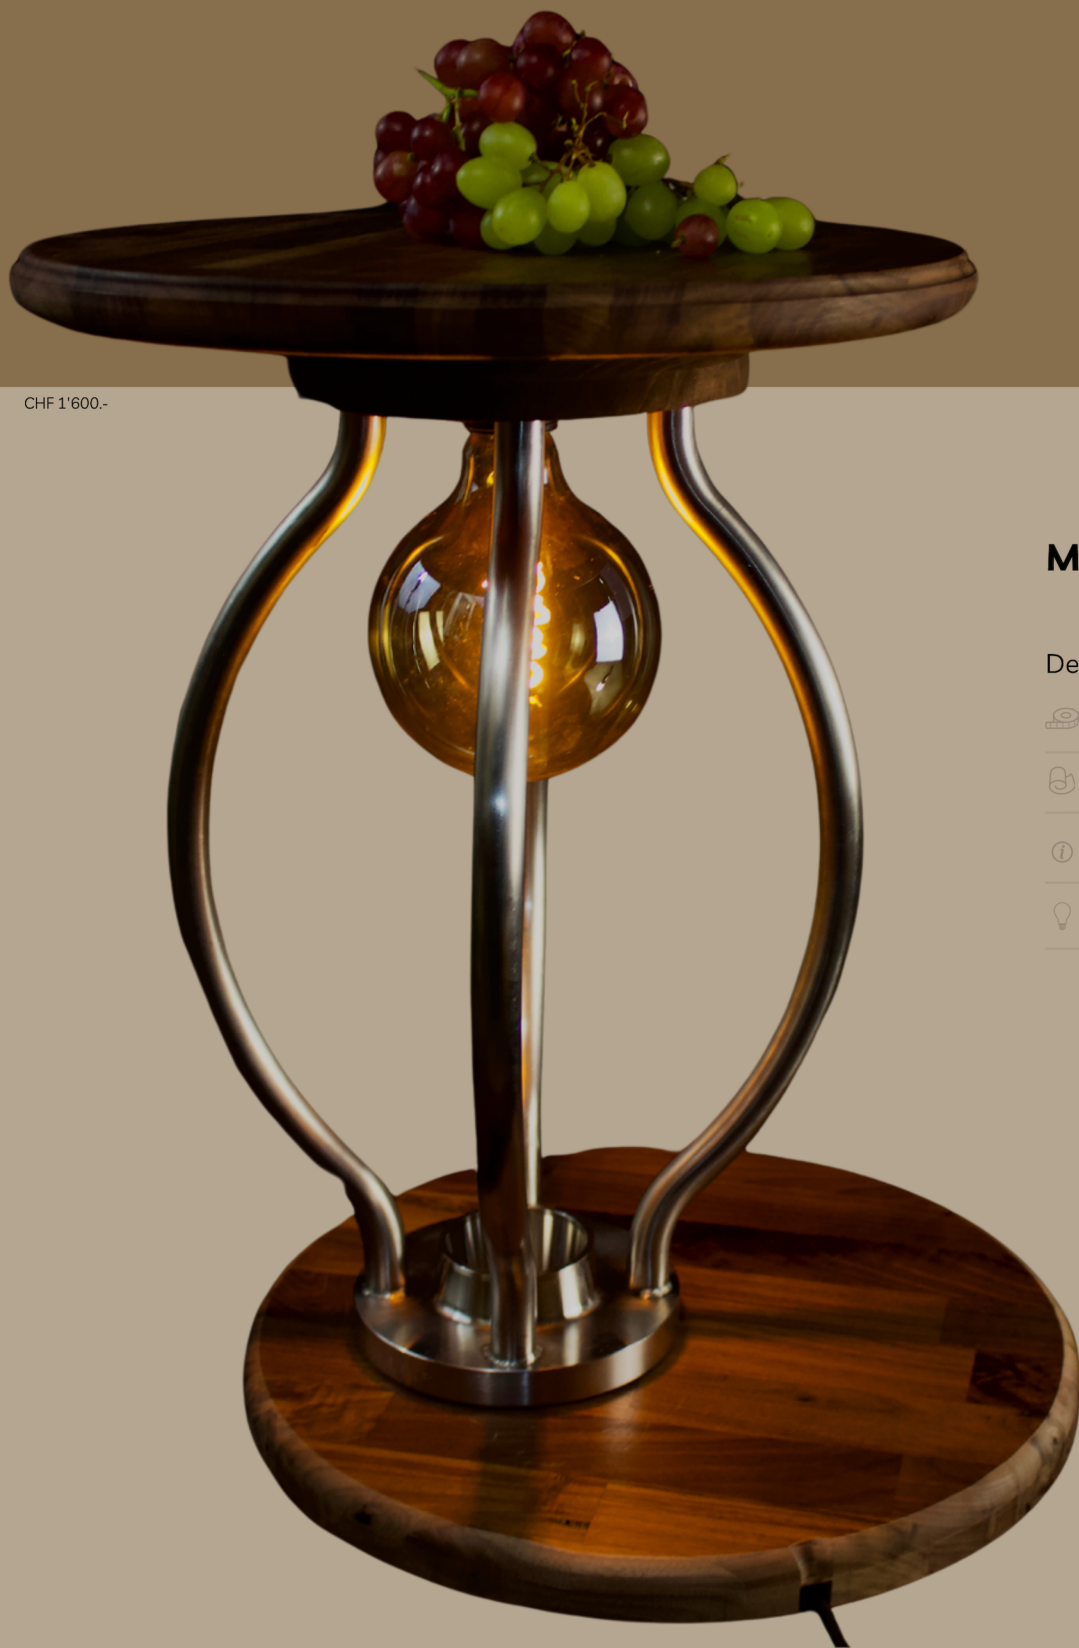

MARCH 2024

The Idea

Giza Lights was born in 2023 from my passion for craftsmanship and artistic design. The many high-quality materials processed with precision mechanics that would be disposed of in industry caught my attention. These diverse metal components inspired me and they deserve to shine anew through upcycling - this is how my long-standing idea of building lamps was put into practice.

CHF 1'600.-

 E14, cable connection

CHF 130,-

Sisi

Add subtle elegance to your restaurant with the original table lamps from Giza Lights. The first collection of restaurant lamps consists of an upcycling element and chrome-plated brass, which provides warm light through LED strips. The base is made from the wood of a table top, giving it new life.

The wood can be cut into different shapes - either a series of the same models or each lamp in a slightly different shape. A sophisticated battery system with rechargeable batteries is hidden in the base. The table lighting can therefore be used independently of power sources and can be recharged sustainably.

The rustic or fine, elegant wooden board, depending on your design requirements, and the tasteful upcycling element fit perfectly into any ambience. Perfectly showcase the unforgettable culinary enjoyment that your guests experience with the right light and create a special atmosphere with the unique table lamp.

Details:

 18 x 12.5 cm

 700 g

 chrome-plated brass, walnut

 LED, battery 52H
